SUMMARY

Senior full-stack engineer with 7 years of experience building production web, mobile and browser-extension products with React, TypeScript, Next.js and Node.js. Recently built the frontend of an AI-powered translation platform for Zoetis; earlier shipped the Ethos Everywhere Chrome extension to 20,000+ users and was a core developer on starknet.io. Works best in small teams, directly with founders, owning features end to end.

EXPERIENCE

Zoetis · Full-stack Developer — 2026

- Built the frontend of BabelVet, an AI-powered veterinary translation platform, from scratch to production (React, TypeScript, Tailwind).
- Added enterprise sign-in with Microsoft Entra ID SSO and role-based access for admins.
- Delivered text and document translation, translation history, a Storybook design system and CI/CD to Azure.

Ethos Network · Senior Front-end Developer — 2024 – 2025

- Expanded the Ethos Everywhere Chrome extension (20,000+ users) from X to OpenSea, Farcaster and Zora, cutting duplicated code by 30–40%.
- Built most of the Ethos.markets frontend in Remix and Tailwind: trading flows, price charts, holdings and user-created markets.
- Shipped Contributor Mode, Listings and Broker in the Ethos web app, plus Node.js, tRPC and PostgreSQL APIs used by the app and the extension.

Freelance clients · Senior Front-end Developer — 2023 – 2024

- Core developer on the starknet.io redesign (React, Vite): reusable UI components and custom Netlify CMS blocks for content editors.
- Built and launched the original Starknet documentation site, with Algolia search.
- Created a React design system (Radix UI, Tailwind CSS, Storybook) published to a private npm registry and used in the client's product.

Yuki · Front-end React Engineer — 2023

- Rebuilt the Yuki website with Next.js, Tailwind CSS and GSAP animations.
- Added NFT minting of game snapshots to GoL2 on Starknet and sped it up with infinite scrolling; built a custom video player on Video.js with Cloudflare Stream.

Air Labs · Front-end React Engineer — 2022 – 2023

- Built features for Air's creative ops platform for visual assets with Next.js, Redux and React Query.
- Rebuilt the marketing site and blog with Next.js, Plasmic and Contentful.

Slexn · Full-stack Engineer — 2021 – 2022

- Customized the Mattermost Enterprise web and mobile apps, including a custom SSO login on Android.
- Led a team of three developers; built GitLab CI/CD pipelines and Docker images for tests and mobile builds.

Damogo · React Native and React Developer — 2020 – 2021

Merchant and customer apps for a food-waste startup; moved them from REST to GraphQL with generated types.

SovereignWallet · React Developer — 2019 – 2020

Crypto exchange frontend (React, Redux), a shared component library and a Web3.js wallet.

Mosanada · React Developer — 2018 – 2019

Dashboard for chatbots on Messenger, WhatsApp, Telegram, Line and Twitter (React, Ant Design, Apollo).
